

AUTO – BALER

Stationary and mobile

The Auto baler is a unique baler that provides a LABOUR SAVING solution to baling various products. The large open top in feed chamber allows for continuous feeding of large cardboard and other products. The “Auto-Cycle” allows for loading of the baler whilst compaction takes place. A simple manual tie and ejection system makes operation quite effortless. This baler is fully safety approved and complies with relevant AS and CE standards. Stationary and mobile applications are available.
